Visuals: Writing about Graphs, Tables and Diagrams 59

Answer Key

Part 1

1. c) and d). Generally, a visual is used to assist in making a concept clearer, but offers, especially with tables, the purpose is to give more details. Actually, a), b) and d) are also correct!
2. c) and d). Since the purpose of a graph or table is to make the text easier to understand, a) cannot be correct. Giving exactly the same information (b) is definitely not the purpose. However, sometimes further explanations are given (c), and, it is always necessary to comment on the significance of the visual (d).
3. c) is the correct answer, because it gives a summary of the significance of the graph. In text a) the figures are simply expressed in words, which are much more difficult to understand than the graph itself, while b) was written by someone who is going well beyond what is in the graph and is discussing errors.
4. 1) Over 1000 million tons; 2) Too small to identify; 3) Just under 1000 million tons; 4) More (531,000 million, against 527,187 million); 5) Less (829.815 against 892,000 million).

Part 2

5. 1 goes with a) and b). Although c) is possible, it is more common in spoken English, and it is better to use *that* in front of the clause.
2. 3 and 7 all go with a). Again, c) is possible, but it is better to insert *that* in written English.
4. 5 and 6 all go with c) only.
6. c)
7. The following are not the only possible answers, but are the most likely ones:
 1. between 1950 and 1990 / from 1950 to 1990
 2. After 1960 / From 1960 (on / onwards)
 3. between 1950 and 1970 / from 1950 to 1970 / for 20 years after 1950, and then / after that was dramatically
 4. throughout the 40 years from 1950 / from 1950 to 1990 / from 1950 for the next 40 years.
